

R-SRAFP App Preview

Description:

NOTE:

See the last slide for a semi-live wireframe demo of the application.

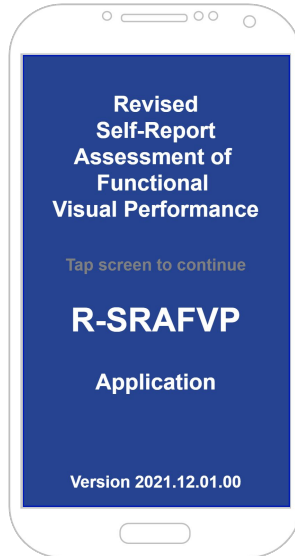

Title Screen

Description:

This is the first screen for the application. Once you tap the screen

Navigation:

User move from this screen to the main application screen.

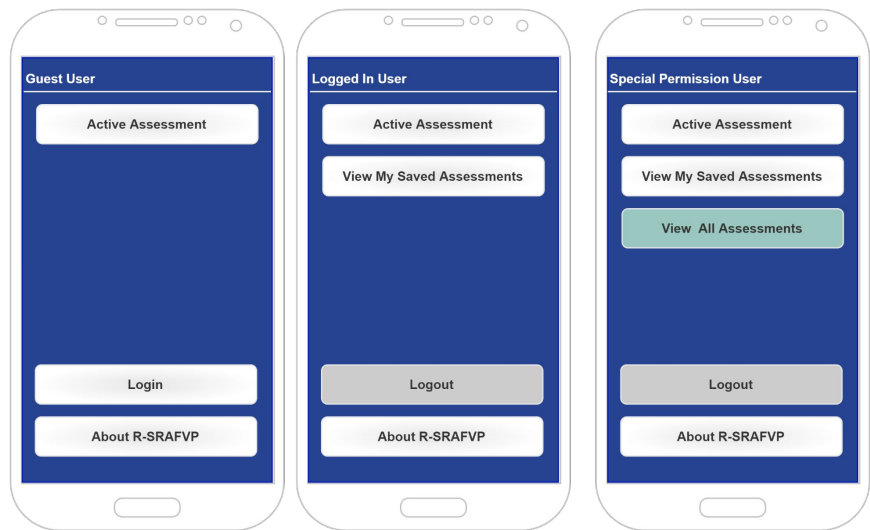

Main Screen(s)

Description:

This is the main screen for the application. Depending on the user (guest, logged in, or special user), different functions will show.

Navigation:

Expected use is to create an assessment. Logged in users may choose to review or update a saved assessment. Special users may choose to view all assessments.

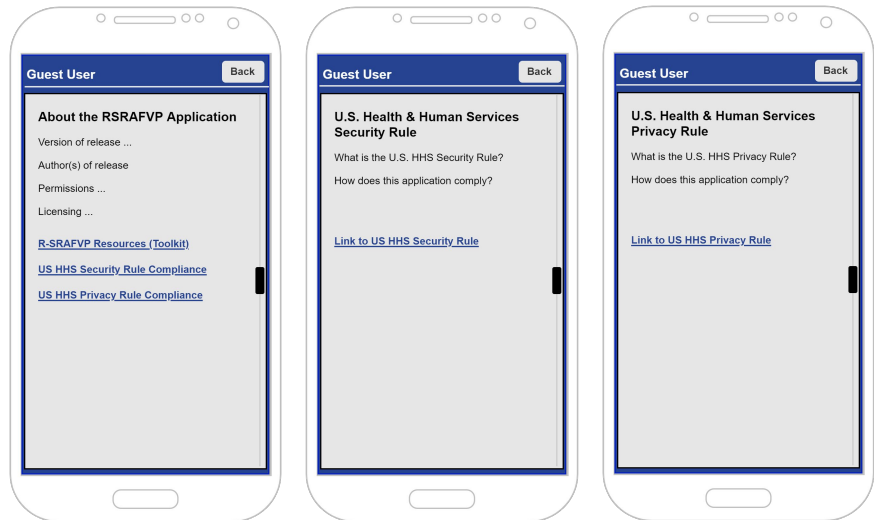

Help Screens

Description:

These are the help screens that provide basic information about the application and US HHS compliance.

Navigation:

Expecting users to use this for reference about the application or understanding about how the application complies with the US HHS Security and Privacy rules.

Login Screen

Description:

This represents a generic view of the login screen. Most providers (ex: Google, Facebook, Yahoo, etc.) will have these types of fields available for the user to login. Note, I am intending on using existing authentication from providers to verify users and then redirect back to this application to save on programming time.

Navigation:

Expecting users to login using their preferred provider (ex: Google, Facebook, Yahoo, Microsoft, etc.).

Active Assessment Screen (Main)

Description:

This represents the top of the assessment form. The hamburger button has been expanded to show the additional functionality from this page.

Navigation:

- Selecting Main / Questions / Score buttons navigates the active assessment
- Selecting Location / Calendar brings up the popup examples
- Selecting the menu buttons in the menu shows examples of functionality planned.

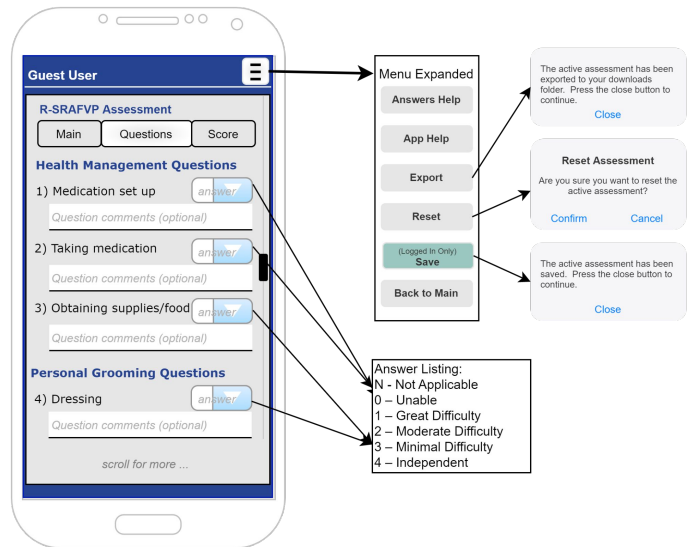

Active Assessment Screen (Questions)

Description:

This represents the top of the assessment form. The hamburger button has been expanded to show the additional functionality from this page.

Navigation:

- Selecting Main / Questions / Score buttons navigates the active assessment
- Select Answers for what an answer dialog would contain
- Selecting the menu buttons in the menu shows examples of functionality planned.

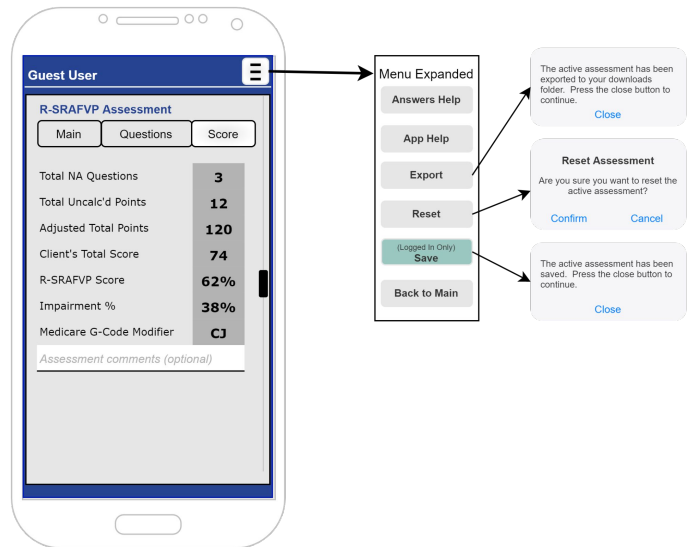

Active Assessment Screen (Score)

Description:

This represents the top of the assessment form. The hamburger button has been expanded to show the additional functionality from this page.

Navigation:

- Selecting Main / Questions / Score buttons navigates the active assessment
- Selecting the menu buttons in the menu shows examples of functionality planned.

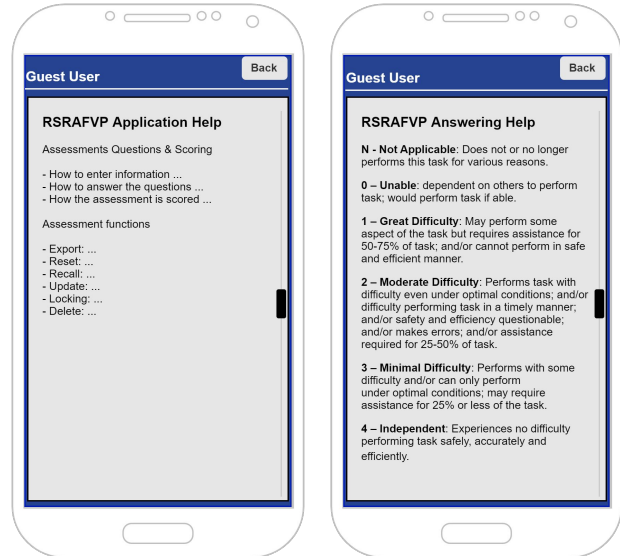

Application Help and Answer Help Screens

Description:

These represent specific help for the application when using the active assessment.

Navigation:

Expecting users to reference these screens while answering questions or wondering how the application functions work. These screens are available from the active assessment screens and the view saved assessments listing.

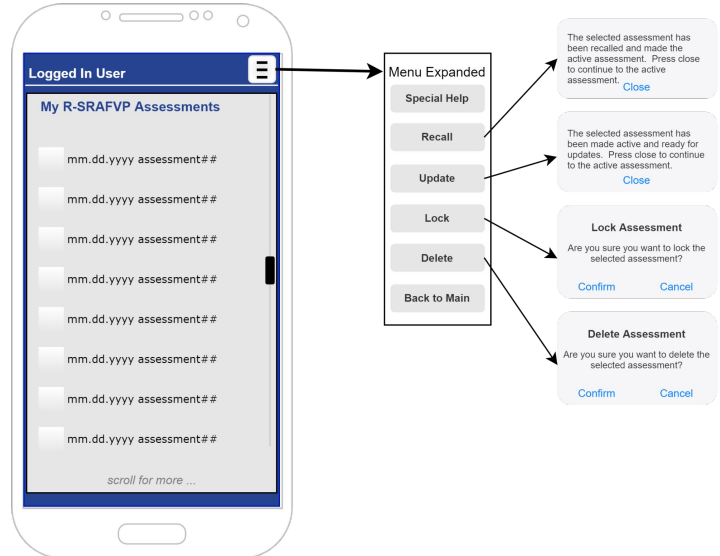

My Saved Assessments Listing Screen

Description:

This shows the listing of saved assessments for the logged in user. The listing is only the ones saved by the specific user. Each assessment is selectable and then a function may be performed on it from the expanded hamburger menu.

Navigation:

Expecting users to use this for Reviewing saved assessments, creating progress/discharge assessments or deleting assessments no longer needed (already uploaded to a medical record system for the patient)

MW: Especially like your explanations for RECALL, UPDATE, LOCK, DELETE- **very clearly** stated

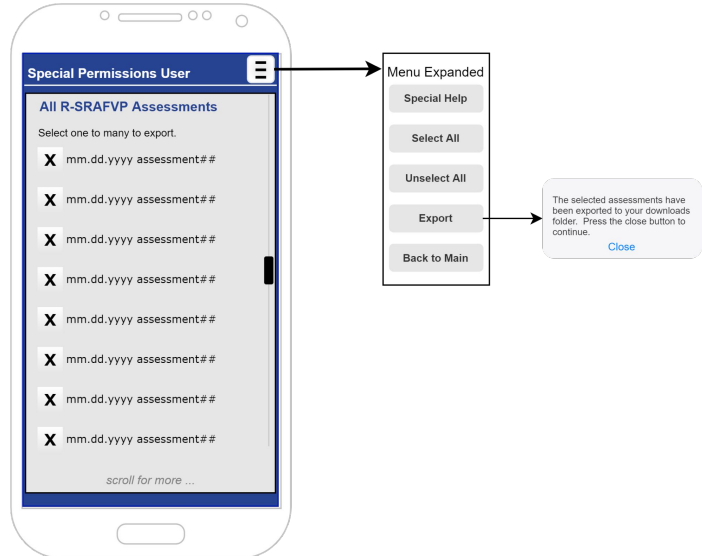

All Saved Assessments Listing Screen

Description:

This shows the listing of all saved assessments for any user. The Special User will only be able to select and export assessments. This prevents changes to saved assessments.

Navigation:

Expecting Special Users to export assessments and use a different application to review the data (ex: Google Sheets, Microsoft Excel, etc.).

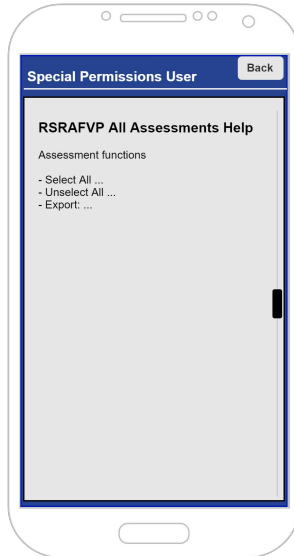

All Assessments Help Screen

Description:

This represents specific help for the Special User when dealing with all of the saved assessments.

Navigation:

Expecting special users to reference this screen while working with exporting assessments for further review.

Application Colors

Description:

These are the official colors from the GVSU and UAB websites that would be used in the application.

Navigation:

None.
